

EPA'S NEW RENOVATION, REPAIR AND REPAINTING RULE RRP COURSE

Attention Contractors/Renovators and Painters

Don't Be in Violation!

In April 2010, this **certification will become MANDATORY** for anyone who could potentially expose children to lead dust. This course covers all the EPA requirements under the Lead Renovation, Repair and Painting Rule (LRRP) to enable a firm to apply for EPA Renovation Firm Certification or to certify an individual as a Certified Lead Renovator". Trained contractors and workers **must** follow lead- safe work practice standards to reduce potential exposure to lead during renovation and repair activities in **target housing or child-occupied facilities**. All **firms and individuals must be certified** before April 22, 2010.

Under the rule, child-occupied facilities are defined as residential, public or commercial buildings where children under age six are present on a regular basis. The requirements apply to renovation, repair or painting activities. The rule does not apply to minor maintenance or repair activities where less than six square feet of lead-based paint is disturbed in a room or where less than 20 square feet of lead-based paint is disturbed on the exterior. Window replacement is not minor maintenance or repair.

Course will include:

1. Role and responsibilities of lead renovator
2. Background info on lead
3. Health effects
4. Setting up work area
5. Lead-safe work practices
6. Personal protective equipment
7. Cleaning methods
8. Cleaning verification
9. EPA and HUD Rules
10. Documentation of the work
11. How to train non-certified renovation workers in lead safe practices while on the job.
